

Installation of NS-3

1. Ubuntu:

```
sudo apt install g++ python3 cmake ninja-build git ccache
```

MacOS:

```
brew install g++ python3 cmake ninja-build git ccache
```

Homebrew Installation

2.

```
git clone https://gitlab.com/nsnam/ns-3-dev.git && cd ns-3-dev &&  
git clone https://github.com/signetlabdei/lorawan src/lorawan &&  
tag=$(< src/lorawan/NS3-VERSION) && tag=${tag#release } && git checkout $tag -b $tag
```
3.

```
./ns3 configure --enable-tests --enable-examples &&  
./ns3 build
```

For Lower Spec:

```
./ns3 clean &&  
./ns3 configure --enable-tests --enable-examples --enable-modules lorawan &&  
./ns3 build
```

4. Test the installation:

```
./test.py
```
